

# HP ZBook Fury 17 G7 Mobile Workstation (9UY36AV) (119W4EA)

## Overview

### Ultimate Z performance just got more portable

HP's thinnest and most powerful 17" performance mobile workstation packs the relentless power of our ultimate Zbook into a dramatically smaller design. Create, render, edit, and simulate with ease. Visualize complex datasets in the field. Incredible performance has never been so portable.

### Unleash the unthrottled power of Z

For the first time ever, get simultaneous, unthrottled performance from the latest Intel® CPUs and pro-grade graphics. Ray trace in the background while working on your next design— This PC thrives on heavy, multi-app workflows.

### Built to perform in the field.

At 29% smaller than last gen with even more power, our flagship ZBook delivers extreme performance on the go[2]. And, noise canceling microphones make collaboration easy from anywhere.

### HP's most expandable 17" mobile workstation

Get desktop-level storage and memory with slots for up to 128GB of RAM, and capacity for a 10TB hard drive[3]. Expansion and servicing are simple with tool-free access to removable components and an extensive port selection for critical accessories.

# Features

## Windows 10 Pro for Workstations 64

Work without compromising on performance or security with Windows 10 Pro for Workstations, powered by HP's collaboration and connectivity technology.<sup>[1]</sup>

## Intel® Core™ i9 processor

Get high-end performance for intensive tasks like rendering and video editing with the Intel® Core™ i9 processor.<sup>[4]</sup>

## HP Z Turbo Drive High-speed Storage

Work without limits in any location with local PCIe storage that's up to 6x faster than SATA SSD, and up to 21x faster than traditional HDD storage.<sup>[5]</sup>

## Spill-resistant Keyboard

Accidents happen - which is why we designed our keyboard with a drain hole, so minor spills flow out the bottom for easy cleanup.

## Industry-leading security features

Advanced security features come standard. System safeguards like HP Sure Start – the industry's first self-healing BIOS – mean your device is locked down tight, so your data and identity are too.

*[2] When compared to HP ZBook 17 G6*

*[3] For storage drives, GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to 35GB of disk is reserved for system recovery software.*

*[1] Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See <http://www.windows.com>.*

*[4] Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.*

*[5] For hard drives, GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to 30GB (for Windows 10) of system disk is reserved for system recovery software.*
