Product Features

Verified for exceptional experiences anywhere

Intel EVO platform, available on select configurations, brings the perfect combination of performance, responsiveness, battery life and stunning visuals to a new class of sleek, stylish laptops. Co-engineered with Intel and verified to provide the ultimate experience for life and work anywhere.

Breaking the boundaries of performance for thin and light laptops

The speed and intelligence of 11th Gen Intel Core processor and up to Intel Iris Xe graphics makes your experience fast, smooth, and easy.

Dell Power Manager with adaptive performance

This 2-in-1 uses adaptive performance based on the latest Intel Dynamic Tuning technology. With this predictive and adaptive engine, their laptop is actively changing the power of its CPU to optimize your specific workload, increasing performance when you need it.

Killer wireless

With advanced Wi-Fi 6 technology and theoretical throughput speeds of up to 2.4 Gbps, the Killer AX1650 is nearly 3 times as fast as the previous generation of 80 MHz 2x2 AC products. It prioritizes streaming video, communication, and game traffic in your system for fast, smooth online experiences.

Stays cool under pressure

Experience the thermal redesign of the XPS 13 2-in-1. With separated dual fans to cover more area, internal vapor chamber and hidden exhaust venting - greater performance is enabled in the thinnest form factor possible.

Elevated experience

The XPS 13 2-in-1 blends together an exceptional user experience and beautiful design. The next gen MagLev keyboard is edge-to-edge, and 24% thinner than a standard keyboard. Additionally, you now have a large touchpad and 16:10 display - this elevates your experience by removing distractions and expanding what you use most.

Revolutionary webcam construction

The XPS 13 2-in-1 webcam isn't just smaller (only 2.25 mm) - it's also better. A 4-element lens uses more elements than a typical webcam to deliver sharp video in all areas of the frame, while temporal noise reduction uses advanced noise reduction, significantly improving video quality, especially in dim lighting conditions. Finally, the lens is assembled with precise machinery to ensure all points of the image are in focus.

Easy to open

The variable torque hinge design makes it easier to open but it also means your screen is more stable, even when you're in motion or using the touchscreen.
